CAROUSEL**

Storing sensitive goods such as drugs can be a challenge: storage areas are usually limited and access has to be closely controlled for close monitoring of drugs replenishing and picking.

The Mini Paternoster is a no-brainer tackling all issues at once: it centralizes up to 80% more articles on a limited floor space and comes with security features from lockable doors to advanced access control. The software make picking, replenishing and inventorying easy and accurate.
